

No Foul

Biofilm and odour control for systems with standing water

No Foul is a professional product for regular maintenance of surfaces and systems where biofilm, mould and unpleasant odours can form. It works at low concentrations, so it is suited to preventive and periodic use. No Foul is not a disinfectant.

KEY PROPERTIES

- Helps prevent biofilm and mould
- Reduces unpleasant odours in systems with standing water
- Effective at very low concentrations
- Suited to regular preventive cleaning
- For systems where water and organic residue collect

TYPICAL APPLICATIONS

- Drip trays, waste buckets, reservoirs and drains of coffee machines
- Floor cleaning robots
- Drains and systems with standing water
- Periodic maintenance of surfaces at risk of biofilm

DIRECTIONS FOR USE

- Use after the regular clean: a small amount left in the system holds back slime and odour until the next service
- Coffee machine waste bucket: about 4 sprays
- For dosing in other systems, contact us

LIMITS AND PRECAUTIONS

- Not a disinfectant: it does not replace a sanitising step where a disinfectant is required
- Does not remove limescale or milk stone; use No Stone Professional for scale
- Check the result under your own conditions of use

FIELD AND USER TESTS

- Coffee machine service company, Kavomat servis Ljubljana (signed protocol, October 2026): coffee oils, milk and organic residue removed, slimy deposits rinsed out. After about 4 sprays into the waste bucket staff no longer noticed the smell. The treated condition was maintained until the next scheduled service visit. No visible surface damage, no hand irritation reported
- Great Robot: development and testing of a solution for floor cleaning robots
- Household floor robots: dirty water stored for about 1 month after cleaning without marked odour or visible mould (internal observation, not a microbiological test)

PRODUCT DATA

Product type	Biofilm and odour control product (not a disinfectant)
Classification (CLP)	Not classified as hazardous according to Regulation (EC) No 1272/2008 (SDS section 2.1)
Personal protection	No special personal protective equipment required in normal use (SDS section 8.2)
Transport	Not dangerous goods for road transport, ADR (SDS section 14)
Packaging	5 l canister. Other sizes and private label on request
Safety data sheet	Available in Slovenian (legally binding version) and in English translation

This data sheet is based on internal laboratory tests and practical trials with users. It describes typical properties and does not replace the safety data sheet or a test on your own equipment. Test on a small, less visible area before using the product on sensitive or already damaged metal surfaces.
